

Track's exclusive octagon-to-round 20, 24 or 28 gauge smooth bore, or .54 caliber or .58 caliber rifled 42" barrels, by Colerain!

Shown with breech plug, installed, at extra cost.
Underlugs and front sight available, installed, at extra cost.

Our 20 gauge barrel is our most popular octagon-to-round barrel, offered in 30", 36", or 42" length. We also offer this barrel in 24 and 28 gauge, .54 rifled, or .58 rifled. Breech is 1" octagon, threaded 3/4-16 for your plug, with a nominal .550" thread depth.

The tapered 1" octagon breech is over 12" long, the front 4" fading to 16 sides, with a double wedding band at the transition to round, and a single wedding band 3" forward. Muzzle end is .815" outside diameter on 42" barrel. Install a concave base front sight.

Our 20, 24, or 28 gauge barrel is cylinder bored for lead or bismuth shot, or patched balls. Never load steel shot in our polished bore. Our .54 and .58 caliber barrels are cut rifled .012" to .016" deep, depending on caliber, with six "round bottom" grooves.

Our 42" barrel fits our stock for English fowling gun, French Tulle fusil de chasse, Type 'C', Type 'D', or Northwest Trade Gun. Align the barrel wedding band with the groove in the stock inletting.

We stock this 20 gauge barrel in 30", 36", and 42" lengths. We can trim our 42" barrel, any gauge or caliber, to your desired length, at small extra cost. Allow five working days shop time.

1710 Dutch Musket barrel, .75 caliber by Colerain:

The British purchased 10,000 Dutch muskets in 1710. Build an early fowler or Committee of Safety musket with this barrel. Length is 46", .750" or .775" bore, 1.250" octagon at breech, tapered 14.5" to a wedding band, to round, .857" at muzzle. Flared tang plug installed.

Part#	bore	length	profile	weight	twist	Price
#Cole-75-Dutch	.750	46"	D	7.0 lb	smooth	\$260.00
#Cole-77-Dutch	.775	46"	D	7.0 lb	smooth	\$260.00

U.S. Model 1803 Harper's Ferry Rifle barrel by Colerain:

We stock the early 33" barrel for the U.S. Model 1803 rifle. Threaded 3/4-16, plug is installed. Cut rifled, .54 caliber, 33" length, 1.105" breech, 10-3/4" tapered octagon, round to .900" muzzle.

Part#	caliber	length	profile	weight	twist	Price
#Cole-1803	.54	33"	1803	5.5 lb	1-56	\$220.00

Unlike cheap tapered octagon-to-round barrels turned from high pressure "drawn over mandrel" hydraulic cylinder tubing, our barrels are gun drilled, precision made, to close tolerances, by Colerain. Our 42" barrels fit our pre-inlet stocks quite well, greatly speeding assembly. Choose our barrel and stock to eliminate the tedious hand work of inletting a 42" tapered octagon-to-round barrel.

Order .600" balls and .010" patches, or .610" balls to load in military style paper cartridges. Order 20 gauge fiber wads, over-powder cards, over-shot cards, and a 5 pound box of lead shot.

Track's octagon-to-round double wedding ring barrel:

Plug is sold separately. Breech is threaded 3/4-16 with a .550" thread depth. Use our special #Plug-ST-16-3-R with .550" thread length for easy installation.

Part#	gauge	length	profile	weight	twist	Price

Baker Rifle barrel, English Model 1800 by Colerain:

Tapered 30" round barrel, for England's first official issue rifle. Threaded 3/4-16 for the breech plug, sold separately.

Part#	caliber	length	profile	weight	twist	Price
#Cole-62-Baker	.62	30"	Baker	5.0 lb	1-66	\$179.00

Track's 42" barrel has a double wedding ring.

Our octagon barrel does require final hand polishing of the octagon flats, sixteen sided transitions, wedding bands, and round sections. Polish flats with emery cloth backed with a file or hardwood block. Draw-file lengthwise. "Shoe-shine finish round portions and bands with emery cloth strips. Never use power buffing wheels.

Gunsmithing Services, and popular options:

We stock our 42" barrel length, with these parts installed:

#Plug-ST-16-3-R	3/4-16, with .550" thread length	\$ 9.99
