

Buckhorn & Semi-Buckhorn Rear Sights

©2012, Track of the Wolf, Inc.
shown actual size
Made in the U.S.A.

Large Hawken rear sight.....#RS-PA-11
Wax cast steel, this rear sight has a long base to fit a slot .697" long, .545" wide and .065" deep. Easily shortened, this larger sight looks right on a big plains rifle with a 15/16" or 1" octagon barrel. Made in the U.S.A. This semi-buckhorn sight is one of our favorites.
#RS-PA-11 Large Hawken rear sight **only \$7.99**

Jim Bridger's rear sight, for 15/16" & 1".....#RS-KC-16
This medium size version of our Kit Carson's Hawken rifle sight is intended for a barrel up to 1" octagon. Tall, to reduce heat mirage, the center notch is indicated. Wax cast steel, made in the U.S.A., the dovetail is about .385" long and .584" wide. Dovetail to a depth of .050".
#RS-KC-16 Bridger style rear sight. **only \$7.99**

Mariano Modena Hawken style rear sight..... #RS-MH-16
Patterned after an original rear sight found on a very early Hawken halfstock rifle, owned by the famous mountain man of Taos, Mariano Modena. Intended for 15/16" and 1" octagon barrels. Angular flats decorate the base of this semi-buckhorn sight. The base is .500" long by .584" wide. Dovetail .050" deep.
#RS-MH-16 Mariano Modena sight **only \$7.99**

Jim Bridger rear sight for 1-1/8" barrels.....#RS-KC-18
This large version of our Kit Carson's Hawken rifle sight is intended for a barrel up to 1-1/8" octagon and is ideal for our Jim Bridger Hawken rifle parts. Tall, to reduce heat mirage, the center notch is indicated. Wax cast steel, made in the U.S.A., the dovetail is about .376" long and .625" wide. Dovetail to a depth of .050".
#RS-KC-18 Jim Bridger large rear sight **only \$7.99**

Fixed Sight with peep..... #RS-CA-Peep-14 or 16
This fixed rear sight provides a little help for older eyes. This sight base may easily be shortened to fit a more narrow dovetail. Always file the sight, never file the barrel. This sight is designed in two sizes, for use on a 13/16" or 7/8" and a 15/16" or 1" octagon barrel, or a swamped or tapered barrel of that size.
The dovetail in the 7/8" rear sight is .750" long as cast and .530" wide. The 1" sight is about .755" long, as cast, and the base is .580" wide. The center of the aperture is .315" above the bottom of the as-cast sight. Thus, the center of the aperture will be about .265" above the top flat of the barrel, assuming a typical .050" rear sight dovetail depth. Wax cast steel, not polished, made in the U.S.A.
#RS-CA-Peep-14 for 13/16" to 7/8" barrels **only \$7.99**
#RS-CA-Peep-16 for 15/16" to 1" barrels **only \$7.99**

Antique style rear sight.....#RS-G-352
This semi-buckhorn sight has much of the grace and style of original rear sights. A graceful steel wax casting, it can be fitted to a standard 3/8" dovetail on an octagon barrel up to 1". The .440" base is .660" wide, .070" deep. Notch is indicated.
#RS-G-352 Antique style rear sight **only \$9.99**

Buckhorn rear sight.....#RS-DB-H-1
This medium size full buckhorn sight has a base for a .615" dovetail and is .502" in width for 15/16" or 1" octagon barrel. Wax cast steel. Deepen the "V" as needed.
#RS-DB-H-1 buckhorn sight, steel **only \$7.99**
