Hawken Pistol Buttcap.....#PBC-HP-B or I

Wax cast in your choice of steel or brass, this buttcap is typically used on "bag butt" shaped halfstock flint or percussion pistols of the 1820-1850 era. Normally anchored in place by a cross pin through the center mounting lug, we recommend using our 3/32" pin, sold separately. Or, you may drill and countersink a center hole for our #Screw-10x1V unplated wood screw. Use a steel screw for mounting a brass or steel buttcap.

#PBC-HP-I pistol buttcap, wax cast steel **only \$10.99**

Early American Pistol Buttcap#PBC-EA-B or I

This buttcap is similar to the one above, except a little larger. It would be appropriate for flint pistols of the 1780 - 1810 era. The tang has been left square, but can be rounded or shortened depending on the style of pistol you are making. Use a #Screw-10x1 to retain the buttcap to the pistol. Wax cast brass or steel.

#PBC-EA-I pistol buttcap, wax cast steel **only \$15.99**

Kentucky Pistol Brass Buttcap#PBC-MA-9-B or S

Sand cast yellow brass or nickel silver, this buttcap is appropriate for American flint pistols of the 1780 - 1810 era. Retain it using our #Screw-10x1-1/2. Inletting is easy, after you file the inside edge square, and realize that only this edge contacts the wood.
