shown actual size

Made in the U.S.A.

#TR-Kent-HB
high bar trigger
\$25.00

#TR-Kent-LB
low bar trigger
\$25.00

High and low bar Kentucky trigger assemblies:

The scroll back trigger has a wide curled face. High or low bar. The trigger is pinned through the plate. The triggerplate is .372" wide by .187" thick, plenty of material to accept a tang bolt.

- #TR-Kent-HB** high bar trigger assembly, 4.56" plate **only \$25.00**
- #TR-Kent-LB** low bar trigger assembly, 5" plate **only \$25.00**

English Sporting Rifle Triggers

#TR-Eng-P
trigger plate
\$12.99

#TR-Eng-T
trigger
\$ 7.99

English Sporting Rifle trigger and trigger plate:

From a fine London Sporting Rifle, this trigger and plate is ideal for your halfstock sporting rifle, or single barrel fowling gun.

The high pivot point gives maximum leverage, for minimum trigger release. This trigger is as light, smooth, and crisp as most set triggers.

The trigger is about .070" thick, and the slot is only .060" width, so it is necessary to thin the trigger, or enlarge the slot. Use a small screw with a smooth shank, such as our small Siler bridle screw, as a pivot.

The trigger plate has a round boss, which may be drilled to accept a tang screw from above, and a threaded triggerguard stub from below.

We recommend our #TG-Eng-1 triggerguard, but any triggerguard with a threaded front boss can be attached. To ease casting, the three leaf petals at the front have been filled in the mold. Two "V" notches must be filed to restore the correct *fleur-de-lis* shape.

A thin wire return spring may be added, but is usually not necessary, since the lock's sear spring returns the trigger, if it is fitted snug against the sear.

- #TR-Eng-T** trigger only, wax cast steel **\$ 7.99**
- #TR-Eng-P** trigger plate, slotted, wax cast steel **\$12.99**

#TR-Gibbs-P
trigger plate
\$12.99

Gibbs - Medford English Sporting & Target Rifle trigger and plate:

This shorter variation of our English trigger and plate has a high pivot point for best trigger release, and a pointed finial that is easy to inlet.

Modeled after an original antique Gibbs - Medford sporting rifle trigger and plate, these wax cast steel parts are easy to file, fit, polish, and assemble.

The large boss may be drilled and tapped for a tang screw from above, and the triggerguard's threaded stub, below.

This trigger and plate is a correct match to our English "bar" locks and square bolster breech plugs shown elsewhere in this catalog. Using our English style parts, you can build a percussion halfstock sporting rifle, target rifle, or smoothbore fowling gun.

- #TR-Gibbs-T** trigger only, wax cast steel **only \$ 7.99**
- #TR-Gibbs-P** trigger plate, slotted **only \$12.99**

#TR-Gibbs-T
trigger
\$7.99

#TR-Fowl-MH-T
trigger
\$6.99

#TR-Fowl-MH-P
trigger plate
\$6.99

English Fowling Gun trigger and plate:

The trigger is attractively styled with a curl at the lip, scrolled back and wide trigger face, for an early English flint fowling gun. The high pivot point will give good leverage for easy trigger release.

- #TR-Fowl-MH-T** trigger, wax cast steel **only \$6.99**
- #TR-Fowl-MH-P** trigger plate, wax cast brass **only \$6.99**
