#Turn-Screw-F set of three, fancy rosewood only \$49.99

Gun Stock Maker's Chisels and Gouges:

Forged in the U.S.A. for gunmakers, these chisels and gouges are made of tempered 1095 high carbon spring steel. Hardened to produce a fine grain structure, 1095 steel has finer grain, greater hardness, and can be whetted to a sharper edge than steels which contain nickel or chrome. Each tool is individually hand shaped, flame hardened, tempered and ready to hone, using our Arkansas stone.

Straight Blade Chisels, in four sizes..... #Chisel-S-##

Made for straight cuts and inside corner work, the gunmaker will find the smaller sizes useful for inletting, and larger sizes useful for outside shaping. The cutting edge is ground square across.

#Chisel-S-1/8 chisel, 1/8" straight only \$10.99
#Chisel-S-3/16 chisel, 3/16" straight only \$10.99
#Chisel-S-1/4 chisel, 1/4" straight only \$10.99
#Chisel-S-3/8 chisel, 3/8" straight only \$10.99

Bent Blade Chisels..... #Chisel-BC-##

The bent blade chisel presents the edge at a convenient angle, to cut those hard to reach places in the lock mortise, and to square the barrel channel behind the plug and tang. It is important to achieve a good fit behind the barrel, as this area absorbs recoil. Bent blade chisels have the edge ground square across.

#Chisel-BC-1/8 chisel, 1/8" bent blade only \$10.99
#Chisel-BC-3/16 chisel, 3/16" bent blade only \$10.99
#Chisel-BC-1/4 chisel, 1/4" bent blade only \$10.99
#Chisel-BC-3/8 chisel, 3/8" bent blade only \$10.99

Gunsmith's Scraper, for inletting round barrels.....#Tool-Curl

Pull the cutting edge inside your stock's round barrel channel, scraping tiny curls, until your tapered round barrel fits perfectly. Three interchangeable cutters allow you to cut different sizes. In between diameters are easily cut, by holding the tool at an angle. To sharpen the cutting disks, remove the handle screw, lay them flat on the stone, and hone until the rim is flat and sharp edged. Set includes handle, mounting screw, 3/4", 1" and 1-1/4" cutters. Use our Inlet Black.

#Tool-Curl scraper, with 3 disks, for round inletting only \$16.99

Be sure to order an Arkansas Whet Stone for your chisels, and keep it on your bench. Slide the cutting edge across the stone, once every minute or two. Use a steady hand, and you will never need to stop and sharpen a dull chisel. It will stay sharp, as you use it.

Whet Stone, double Arkansas stones..... #Whet-2

Both medium and fine grit Arkansas stones, mounted in a convenient block of solid oak. Approximately 2 x 4" stones, gift packed in a protective case, just right for sharpening a gunmaker's chisels.

#Whet-2 mounted double Arkansas stones only \$17.99

Inletting Black, and Inletting Gold..... #Inlet-Black or Gold

Jet black pigment, in a grease base that won't dry out. Simply "dry brush" a tiny amount on the part, press it into the mortise, and the "fingerprint" left behind will make interference areas obvious. A few authors call this stuff "inletting compound" or "spotting compound". We recommend our "Gold" color, if you are working with walnut.

#Inlet-Black inletting black, 1/2 ounce, for maple only \$ 6.99
#Inlet-Gold inletting gold, 1/2 ounce, for walnut only \$11.50
