Durs Egg flint lock, right hand

#Lock-LR-1100
inside. Exterior parts are grit blasted to a matte gray.

Refer to our reprint of Henry Nock’s Patent Breech fitted with such a fine lock invariably have a flash hole liner fitted, for on this nice lock, in good weather or bad, to spark well. English rifles link “has failed, this fine lock will fire one last shot. You can depend arm or link should break while being cocked. But even if this “weakest tumbler has a lower arm, made to catch the mainspring if the tumbler should break. Notice the “cut away” tumbler and “swing out” link, which greatly simplify lock disassembly. These are fine English innovations. This tumbler has a lower arm, made to catch the mainspring if the tumbler arm or link should break while being cocked. But even if this “weakest link” has failed, this fine lock will fire one last shot. You can depend on this nice lock, in good weather or bad, to spark well. English rifles fitted with such a fine lock invariably have a flash hole liner fitted, for fastest ignition. Refer to our reprint of Henry Nock’s Patent Breech patent drawings for details of original flash hole construction.

This frizzen is a snug fit to the pan. The lock plate is polished bright inside. Exterior parts are grit blasted to a matte gray.
