G. Goulcher cap lock, cut for 1/2" powder drum ... **#Lock-GG-SR**

This lock has the correct hammer to align with a powder drum. It is pre-inlet to fit our Vincent ~ Ohio Rifle stock. Use our 1/2" drum.

The Goulcher family made thousands of locks. They are found on plains rifles, late longrifles, pistols and shotguns of the 1840 to 1880 era. Our *G. Goulcher* lock is pre-inlet in our Vincent rifle stock. Cut for a 1/2" powder drum. The lock has an engraved hammer with 1.65" throw, for barrels from 13/16 to 1" octagon. Engraving is cast-in.

Internally identical to our Jim Bridger's Hawken Lock, with tempered parts, fly detent for set trigger, and stirrup link.

Squirrel engraved cap lock..... **#Lock-SQ-CL-RH**

This late percussion lock has engraving cast into the surface of the hammer and plate, decorated with 'S' and 'C' scrolls and leaves in classic style. The leaves open to a clearing at front, revealing a bushy tailed squirrel on the limbs of a tree.

An example of American folk art circa 1853, from a rifle by O. B. VanDenBurgh, Findlay, Hancock County, Ohio, shown in *Ohio Long Rifles, Volume 1*, by Dr. James B. Whisker.

This lock is ideal for use on a small caliber fullstock or halfstock rifle, or perhaps a belt pistol. Made in right hand, only.

While the hammer and plate are unique, internally it uses our popular small Siler parts, except for the large Siler mainspring, which makes this lock snappy.

This lock uses only one lock bolt. A fly detent allows the use of a set trigger.
