Ramrod Pipes for early French Fusil Fin fine fowling guns:

These wax cast pipes are modeled after originals from fine fusils. Dating from 1700 to 1760, original French fusils and trade guns are scarce and valuable. Made in the U.S.A., our pipes are correctly sized for a 7/16" rod. We recommend tapering our 1/2" diameter 48" ramrod blank, as shown in Recreating the American Longrifle.

Notice that these 7/16" diameter pipes strongly resemble later English Sporting and Fowler rod pipes, and look right on such guns.
