Carlos Gove "Chunk Gun" Rear Sight

**#RS-HA-5** sight kit $34.99

Carlos Gove "Chunk Gun" Adjustable Rear Sight........... **#RS-3A**

Modeled after an antique rear sight on a heavy barrel percussion target rifle by famous American gun maker Carlos Gove, this sight is sometimes called a "chunk gun sight" since heavy percussion rifles were often shot from prone position with the forend resting on log or "chunk". Use this sight on a late fullstock or heavy barrel halfstock Plains rifle with a 1" or 1-1/8" octagon or heavier barrel.

Easily installed, no tempering is required. Simply file and polish these castings, drill and tap a pivot hole in the barrel, cut a dovetail notch, slide and screw this primitive adjustable rear sight into position. In actual use, the dovetail bar is positioned 3/8" behind the rear sight, exactly 4-1/4" from the pivot screw hole.

Carlos Gove Adjustable “Step Bar” Rear Sight:

This nice wax cast steel rear sight kit consists of five (5) pieces: a 5-1/4" long sight body, elevation ratchet step bar, windage dovetail saddle, pivot anchor screw, and illustrated instruction sheet.

---

**L&R’s adjustable five step Hawken rear sight kit.........** **#RS-HA-5**

Known as a Rocky Mountain Rear Sight, this long adjustable sight has a .370" x .085" dovetail spaced 3" ahead of the normal location. A great choice for use on your halfstock Hawken rifle, it works well on 15/16", 1", or 1-1/8" octagon barrels.

Not a fixed iron sight, it does not meet N.M.L.R.A. Hawken match rules, but it may be used in “adjustable sight” matches. Best quality alloy steel wax castings, made in the U.S.A. by L&R. Machined and deburred, these sight parts are ready for installation and use, without file fitting. The step bar has five elevation levels.

Abrasive blasted to a grey matte finish, this sight is ready for browning, or polish it bright and blue it.

**#RS-HA-5**
adjustable rear sight, five step $34.99

**#RS-HA-5-Ramp**
spare five step sight ramp only $8.99
