

Buttplate, wax cast brass or steel....#BP-Beck-1-B or I
 A long wide Lebanon or Lancaster County buttplate, in the style of John Philip Beck, a very famous early maker.

Buttplate, sand cast yellow brass..... #BP-MA-122-B
 An Allentown - Bethlehem style buttplate, a bit longer than other Lehigh County style buttplates, in brass only.

Buttplate, wax cast brass or steel....#BP-Early-2-B or I
 Allentown - Bethlehem or North Hampton buttplate. An intergral "lip" protects the rear edge of the patchbox lid.

When ordering, our part numbers are actually "part names" and numbers. When we offer both brass or iron, the suffix "B" and "I" indicate brass or iron. Be careful not to confuse an "I" (aye) with a "1" (one), since they appear similar.
