Polished Cow Horns

Raw Horns, polished, white for scrimshaw, or mottled colors:
Our scrimshaw quality horns are cleaned, sanded and polished, but not ruined by excess buffing. We prefer the hand scraped satin appearance of old horns. Rub the horn, lengthwise, with 0000 steel wool, or abrasive cleanser to reduce the shine. Rub along the grain direction, like wood. Dimensions are for the longest arc, measured around the outside of the curve of the horn. White horns are prized for scrimshaw engraving. Most cow horns are darker mottled colors.

White horns are scarce, not always available from stock. Check our web site for In-Stock status, at www.trackofthewolf.com

Small Horn, about 6 to 8” arc, for priming horn.
#Horn-P-SW  horn, small, 6 to 8” arc, mostly white only $21.99
#Horn-P-SS  horn, small, 6 to 8” arc, mottled dark only $13.99

Medium Horn, about 8 to 10” arc, for day horn.
#Horn-P-MW  horn, medium, 8 to 10”, mostly white only $23.99
#Horn-P-MS  horn, medium, 8 to 10”, mottled dark only $21.99

Large Horn, about 10 to 14” arc, for powder horn.
#Horn-P-LW  horn, large, 10 to 14”, mostly white only $25.99
#Horn-P-LS  horn, large, 10 to 14”, mottled dark only $21.99

Ugly Horn, odd shaped, or clipped tip .............#Horn-Ugly
Make flask horns, flat horns, buttons, combs, inlays, turnings or practice your horn carving or scrimshaw engraving on these horns. Not always available, limited supply
#Horn-Ugly oddly shaped or flawed raw horn only $ 2.50

Flint Priming Flasks

Flint Priming Valves…………………………………….#PV-1 or 3
Our brass priming valves have a knurled body, which may be glued to your wood, horn, or antler flask. Drill deep enough to hold a quantity of priming powder. The valve unscrews, to allow filling through the body. Use FFFFg black powder for priming only.
#PV-1  1 grain valve, for 7/32” hole only $ 6.99
#PV-3  3 grain valve, for 9/32” hole only $ 6.99

Flint Priming Flasks …………………………….#Flask-PP-3, 4 or FF
Brass flasks for FFFFg powder. Our smallest flask dispenses about 3 grains for pistols or rifles. Our largest flask dispenses 4 grains for rifles, fusils or muskets. Our hunter’s flask has a free flow valve.
#Flask-PP-3  throws 3 grains of FFFFg only $12.99
#Flask-PP-4  throws 4 grains of FFFFg only $13.99
#Flask-PP-FF with free-flow valve for FFFFg only $12.99

Flint Priming Valve, for powder flask…….#SP-PV3 or #SPS-PV3
Priming valve for a Colt size flask, or Pocket flask using the smaller spout. The valve is used by removing the flask valve spring, locking the flask valve open and threading the priming valve into the spout hole. Designed for FFFFg black powder only, it throws about 3 grains.
#SP-PV-3  for Colt and large flasks, 10-1mm threads only $6.50
#SPS-PV-3 for Pocket and small flasks, 8-75mm threads $6.50

Percussion Nipple Priming Flask .....................#Primer-B
This tiny flask dispenses priming powder directly into the nipple, to clear a misfire. It must be filled with very finely granulated black powder. The inside cone shape fits all nipple sizes. For clearing misfires, only.
#Primer-B  nipple primer, brass only $10.99
