#Block-(32-69)
Wooden Loading Block
\$4.75

Wooden Loading Blocks, for hunters #Block-(caliber)

These miniature "bread boards" shaped accessories are made from hardwood, drilled to hold lubricated patched round balls. Before hunting, grease your patch, center it over a hole, and press the ball into the patch and force it into the hole, using a short starter. Push it until the ball protrudes below. This protruding bulge can be quickly centered on the muzzle, and patched ball rammed home with the starter. These sizes can easily be enlarged to fit odd calibers by reaming the hole with sandpaper around a slotted dowel.

- Specify .32, .36, .40, .45, .50, .54, .58, .62 or .69 caliber.
- #Block-(caliber) wooden loading block **only \$ 4.75**
