

Nipples for percussion rifles, pistols, shotguns

Track's new nipples - 416 Stainless - our best choice:

Track's new Chromium Steel Nipples now make the old yellow Beryllium bronze AMPCO® nipples obsolete.

Using modern tungsten carbide tooling in our state-of-the-art Citizen Swiss A32 CNC machine, our new nipples are precision turned in our new factory in Elk River, Minnesota.

Made from 416 alloy (12% Chromium), the first free machining stainless alloy with Martensitic qualities (hardenable, tempers normally, and is magnetic unlike most stainless alloys). Stronger, tougher, more resistant to battering, 416 alloy is longer lasting than the famous old Ampco bronze nipples, now obsolete.

Truly precision turned, our nipples have tapered cones made to perfectly fit the CCI brand No. 11 standard cap, or the identical Dynamit - Nobel RWS brand No. 1075 (red label) cap. Remington No. 11 caps are a tiny bit larger, an easy fit. Track has improved the fit, and extended the life of our percussion nipples.

Track's new nipples - for the traditional purist hardened and tempered carbon steel, as original:

Purists will appreciate our temper blued steel nipples, made from traditional carbon steel, as were the original nipples. Hardened and tempered to R_c 38 - 44, these long lasting nipples require hot water cleaning after each day's use, as original. Coat the nipple threads with Birchwood Casey's Choke Tube Lubricant to allow easy removal, even after a long day of competition shooting.

Discard the factory made blued steel nipples supplied on imported replica guns, especially revolvers. Made to fit some unknown European cap, they have too much taper to prevent cap fragments from falling into the hammer notch, jamming your revolver. Our nipples fit CCI & RWS No. 11 standard caps correctly.

• Oversized nipples safely replace 1/4-28 nipples in threaded seats which are loose from wear. Use caution to insure that oversized thread nipples fit properly. Antique worn rusty shotgun nipples may be replaced by one of the above sizes. A slightly oversized nipple can often be inserted in a worn or rusted hole, without re-tapping, but we recommend re-tapping with our oversize nipple taps.

Use CCI or Remington No. 11 caps. Hardened steel nipples have a square shank as original, to restore the antique appearance.
