Case Sizing Lube, by Rooster Laboratories...#Lube-PDQ-21
A little goes a long way. Allow it to dry before you start sizing. With its alcohol base and metal protectants for steel and brass, PDO-21 is a high-tech extreme pressure lube which spreads easily on its own and dries quickly. Spread the cases out on a flat surface and mist them lightly with the enclosed pump-spray, and then roll them back and forth to help spread the lube on the cases. Will not affect primers or powder. The lube must be allowed to dry before you size your cases. 8 ounce spray bottle.

#Lube-PDQ-21 Spray bottle, 8 ounces only $9.95

Case Bright, by Rooster Laboratories.............#Case-Bright
Formulated specifically as a media additive for polishing brass cartridge cases, Case bright cleaner-polish-protectant radially speeds up production and leaves your brass gleaming (protected by corrosion-inhibitors), and impervious to finger stains. This is a user-friendly, ecologically sound, bio-degradable product (protected by corrosion-inhibitors), and impervious to finger stains. Pleasant to use, 8 ounce bottle.

A set of three double ended brushes gives you the ability to clean firearm surfaces effectively without damaging them. They are constructed with durable, flexible plastic handles and bristles that are resistant to flattening and breaking. These brushes are designed not to react with cleaning solvents, or oil, and will not corrode. Sold as a pack of three, one nylon, one bronze, and one stainless. Nylon bristles are best for the most delicate parts of a firearm. This brush protects the beautiful finish, as well as the surfaces of older firearms with a fine patina. Bronze bristles with its stout nature, removes hard deposits easily and without damaging many blued or stainless surfaces. Stainless steel brushes can be abrasive and should be used on only the most stubborn deposits.
