Lyman Reloading Dies

Lyman Precision Loading Dies:

Two Die Sets consist of a full length resizing die with decapping stem and neck expanding button, and a bullet seating die with crimp. Two die sets are the reloader’s choice for loading jacketed bullets in bottleneck rifle cases. For those who load cast bullets, we suggest the addition of a neck expander die, sold separately.

- #Lyman-Die-30-30 dies, .30-30 Winchester only $35.99
- #Lyman-Die-32-Win dies, .32 Winchester Special only $35.99

Three Die Sets. Straight wall cartridge cases require a three die set, consisting of a full length resizing die with decapping stem, a two step neck expander die, and a bullet seating die with crimp.

- #Lyman-Die-25-20 dies for .25-20 Winchester only $46.99
- #Lyman-Die-32-20 dies for .32-20 Winchester only $46.99

- .50-70 Government, .50-90 Winchester, 56-50 Spence........#22
- #Lyman-Shell-(#) shell holder only $6.99

Black Powder Cartridge Shooter’s Tip:

Loaded ammunition is frightfully expensive, today, partly due to the cost of brass. The case is the most costly part of any cartridge, and is not worn out when fired. It may be reloaded and fired 20 times or more. Hand loading is profitable, enjoyable, and easy.

The Lyman 310 tool is simple to use, and the dies listed will often load calibers not listed. We load our .44 Colt cases for the 1871 - 1872 Open Top Colt revolver, using .44 Magnum dies. The .38 Special dies will load .38 Short Colt or .38 Long Colt, and the popular .45-70 die set will quickly pay for itself in cost savings!

Lyman Black Powder Neck Sizing Dies:

Made to match the Classic Die Sets in black powder rifle calibers, you can maintain your fire formed case dimensions, and avoid resizing your costly brass cases. These dies size the neck, only. Fired cases produce better accuracy, when using the fired case in the same rifle, because the body was fire formed to a perfect fit.

- #Lyman-Neck-40 .40-65, .40-70 Sharps Straight only $25.99
- #Lyman-Neck-45S .45-70, .45-90, .45-100 Sharps only $25.99
- #Lyman-Neck-45L .45-110, .45-120 Sharps only $25.99

Lyman Taper Crimp Dies, for Black Powder Cartridges:

Many black powder cartridge rifle loads require compression for proper ignition. Firm neck tension helps provide compression. Taper Crimp Dies have minimum taper, allowing you to apply proper neck tension, without damaging the bullet, for best accuracy.

- #Lyman-Die-40-Ta taper crimp, .40 caliber only $19.99
- #Lyman-Die-45S-Ta taper crimp, .45-70 to .45-100 only $19.99
- #Lyman-Die-45L-Ta taper crimp, .45-110, .45-120 only $19.99

Sizing Dies and Top Puncches

Lyman bullet sizing dies have 90° hole spacing. It is easy to lubricate bullets, even with hard lubricants. Lyman sizing dies feature a tapered mouth, and a hardened interior, insuring alignment for a perfectly cylindrical bullet. These diameters correspond to suggested sizes for popular rifle and pistol calibers. Need other sizes? See our web site.

Lyman Black Powder Neck Sizing Dies:

When Lyman introduced the original 310 tool, more than 100 years ago, it was named “The Ideal Tool” and was sold as standard equipment for the Sharps, Remington, and Winchester rifles of the era. This simple compact reloading tool can go anywhere. Hand load rifle or pistol cases, at home, at the range, or in camp.

- #Lyman-310-S Lyman 310 Tool for short cases only $54.99
- #Lyman-310-L Lyman 310 Tool for long cases only $54.99

Lyman 310 Die Sets.................................#Lyman-310-(caliber)
